Commissioner for Patents

This application contains claims directed to the following patentably distinct species: (1) a device for closing an opening in tissue having a first lumen, a second lumen and a wound cover member as set forth in claims 10, 22-24 and 34, (2) a device for closing an opening in tissue having a first lumen, a second lumen, a wound cover member, and a tissue stabilizer as set forth in claims 25-29, (3) a device for closing an opening in tissue having a first lumen, a second lumen, a wound cover member, and a flow guide as set forth in claims 11-14, (4) a device for closing an opening in tissue having a first lumen, a second lumen, a wound cover member and an organ stabilizer as set forth in claims 17 and 30-32, and (5) a device for closing an opening in tissue having a first lumen, a second lumen, a wound cover member and an organ stabilizer having a ridge as set forth in claims 18, 19 and 33. The species are independent or distinct because they do not overlap in scope.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 21 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
